Attention: Mr. Joe Fawal

Reference: Phase I Environmental Site Assessment
 Boyd Bros. Drilling
 1631 Carolina Avenue
 Bessemer, Jefferson County, Alabama
 AEE Project Number 91099

Dear Mr. Fawal:

American Environmental Engineering, Inc. (AEE) is pleased to submit the following Phase I Environmental Site Assessment for the above referenced property. The purpose of this assessment was to explore site-specific environmental factors that might have an impact on the planned use or sale of the property. The findings of this assessment are presented in the following sections of this report.

AEE appreciates this opportunity to be of service and looks forward to working with you in the future. If you have any questions concerning the information in this report or if we may assist you further, please do not hesitate to contact our office at (205) 699-8505, fax (205) 699-5697, or Email to Steveaee@mindspring.com.

Respectfully submitted,

AMERICAN ENVIRONMENTAL ECOLOGY, INC.

Steve K. Osborn, CHMM, CHME, PWS, CMC
President

Encl.

EXECUTIVE SUMMARY

American Environmental Ecology, Inc. (AEE) has completed the authorized Phase I Environmental Site Assessment of Boyd Bros. Drilling located at 1631 Carolina Avenue in Bessemer, Alabama located in Section 10, Township 19 South, Range 4 West in Jefferson County, Alabama.

A representative of AEE conducted a Phase I Environmental Site Assessment on September 26, 2011. The purpose of this assessment was to explore site-specific environmental factors, which may have an impact on the subject property.

The findings of this assessment are summarized as follows:

- The property is occupied by a one (1) story brick building that measures 60.1 x 140 ft² and a 50 x 140 ft² laydown/storage yard. The property is currently zoned 16 and the current land use is listed Commercial.
- The Sanborn Map dated 1924 shows the subject property was vacant. In 1950 and 1959, the sanborn maps indicated labor type housing on the subject property.
- The City Directory lists Joy Manufacturing Co. Drilling Contractors at the subject property from 1969 to 1984. From 1990 to 1996, the City Directory shows that C B C Drilling Contractors occupied the subject property.
- There are twenty-three (23) listed facilities within the search radius established by ASTM guidance, listed in **Appendix B**.
- The facility is a conditionally exempt small quantity generator under the Alabama Department of Environmental Management (ADEM) regulations for a D001 designated flammable waste (cleaning solvents).
- An asbestos survey was not conducted for this site although suspect asbestos containing materials exist; ie. Floor tile, ceiling tile, caulking and sheetrock materials.

- According to the EDR Radius Map Report, there is one (1) UST listed on the subject site. On May 10, 1991, the Alabama Department of Environmental Management (ADEM) submitted a “No Further Action Letter” which states that ADEM closed out the UST according to their regulations.

1.0 INTRODUCTION

1.1 Purpose and Scope of Work

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify recognized environmental conditions in connection with Boyd Bros. Drilling use of the subject site. This Phase I ESA was conducted in accordance with the guidelines established by ASTM E 1527-05 and by AEE’s scope of work, authorized by American Environmental Ecology, Inc. It was not the sole purpose of this study to determine the actual presence, degree and/or extent of contamination, if any, on the subject site.

This Phase I ESA does not include soil, air, water, lead paint or asbestos testing, assessment of subsurface geological conditions, mine studies, assessment of sinkhole activity, or confirmation of off-site contamination.

1.2 Limitations and Exceptions of Assessment

A Phase I ESA is not a comprehensive site characterization and should not be construed as such. Specifically, limitations stated in ASTM E 1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and AEE’s Terms and Conditions apply to this report.

A normal standard of care has been taken by AEE in compiling and checking the information contained in this report, in order to verify that it is current and accurate. However, AEE is not responsible for any errors, omissions or inaccuracies in reasonably ascertainable information or undisclosed environmental conditions and is not responsible for any conclusions or opinions made by others based on this report.

Additional services, including a broader scope of assessment, more detailed conclusions; liability/risk evaluation, etc. were beyond the scope of this ESA.

1.3 Limiting Conditions and Methodology Used

The Phase I Environmental Site Assessment is comprised of four components:

1. Record Review
2. Site Reconnaissance
3. Interviews

4. Evaluation and Report

The methodology used in preparing this report includes reviewing available literature, applicable government documents and records, and conducting a site reconnaissance.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject property is located at 1631 Carolina Avenue in Bessemer, Alabama. More specifically, the site is located in Section 10, Township 19 South, and Range 4 West, in Bessemer, Jefferson County, Alabama¹. A site location diagram is attached as **Figure 1**.

2.2 General Physical Setting

Jefferson County is in the central part of Alabama. It has a land area of 713,600 acres or about 1,115 square miles.

The subject property is located in the Jones Valley, situated within the Birmingham Valley and Ridge section of the Valley and Ridge Province of the Appalachian Highlands physiographic division.

Soil scientists have determined that there are approximated twenty one (21) different kinds of soils in Jefferson County.

The subject site sits on the **Tupelo-Urban Land complex** which is composed of moderately well-drained Tupelo soils and areas of Urban land on sides of limestone valleys. Some areas have sinkholes. Tupelo soils are nearly level to gently sloping, slowly permeable and have a high shrink-swell potential. They generally have a high water table. They generally have a silt loam surface layer and silty clay sub-soils.

2.3 Site and Vicinity Characteristics

The site is situated in a commercial area of the Bessemer, Alabama. Typically, the groundwater in this area occurs at depths of less than twenty five feet as a perched water zone. The groundwater table is not usually level, but is found to be a subdued reflection of the land surface and/or subsurface limestone formations.

2.4 Description of Improvements and Current Site Use

Boyd Bros. Drilling stores parts for drill rigs and provides maintenance for both drill rigs and trucks on site. The lay down yard, separated from the maintenance building by one (1) small lot is used for rig storage and pipe storage.

¹ Longitude N33.397500° Latitude W86.952600°

The property is occupied by a one (1) story brick building measuring 60.1 x 140 ft.² and a separate 50 x 140 ft² laydown/storage yard.

The subject site is at a mean sea level elevations of 516 feet. Surface drainage on the site is toward the south and empties into Valley Creek which empties into the Black Warrior River.

2.5 Past Uses of the Property

The Sanborn Map dated 1924 shows the subject property was vacant. In 1950 and 1959, the sanborn maps indicated labor type housing on the subject property.

The City Directory lists Joy Manufacturing Co. Drilling Contractors at the subject property from 1969 to 1984. From 1990 to 1996, the City Directory shows that C B C Drilling Contractors occupied the subject property.

2.6 Current Uses of Adjoining Properties

AEE made a drive-by reconnaissance of those areas accessible by road or trails to determine the current uses of immediately adjacent properties. Current property usage adjacent to the site is summarized below.

North	Residence
Northeast	Residence
East	Residence
Southeast	Residence
South	Residence
Southwest	The Learning Center at New Life
West	Railroad Tracks
Northwest	Railroad Tracks

3.0 RECORDS REVIEW

3.1 States and Federal Regulatory Listing Review

Environmental Data Resources, Inc. (EDR) of Southport, Connecticut, conducted a listings review for the subject property. All applicable EDR information is included in **Appendix A**. The listings reviewed include:

National Priorities List (NPL) - Published by the U.S. Environmental Protection Agency (EPA), is a listing of uncontrolled or abandoned hazardous waste sites, which are targeted for possible long-term remedial action under the Superfund Act. This listing was reviewed from the site outwards for a one (1) mile radius. Last updated 2001.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) - Published by the U.S. EPA, is a compilation of known or suspected uncontrolled or abandoned hazardous waste sites which have been investigated or are currently under investigation by the EPA for the release or threatened release of hazardous substances. This listing was reviewed from the site outwards for a 0.50-mile radius. Last updated February 25, 2011.

CERCLIS-No Further Remedial Action Planned Sites (NFRAP) - Published by the EPA, is a listing of sites, which have been removed from the EPA's CERCLIS listing. This listing was reviewed from the site outwards for a 0.50-mile radius. Last updated 2001.

Corrective Action Reports (CORRACTS) – Database maintained by the U.S. EPA. This is a listing of RCRA facilities undergoing corrective action. This listing was reviewed from the site outwards for a one (1) mile radius. Last updated March 9, 2011.

Resource Conservation and Recovery Information System (RCRIS) - Published by the U.S. EPA, Is a listing of facilities that generate, transport and/or dispose of hazardous waste as identified by the Resource Conservation and Recovery Act. This listing was reviewed from the site outwards for a 0.125-mile radius. Last updated 2001.

Emergency Response Notification System (ERNS) - Published by the U.S. EPA, is a national computer data base system that is utilized to store information on the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. This listing was reviewed from the site outwards for a 0.125-mile radius. Last updated 2001.

Biennial Reporting System (BRS) - List provided by the EPA. This listing collects data generation and management of hazardous waste from Large Quantity Generators (LQG) and Treatment, Storage and Disposal Facilities. Last updated 2001.

Superfund (CERCLA) Consent Decrees (CONSENT) – List provided by the EPA. This listing provides information on major legal settlements that establish responsibility and standards for cleanup at NPL sites. Last updated 2001.

Records of Decision (ROD) – List provided by the EPA. This listing provides ROD documents mandate remedy at an NPL site containing technical and health information to aid cleanup. Last updated 2001.

National Priority List Deletions (DELISTED NPL) – List provided by the EPA. This listing provides through the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to deleted site from the NPL. Last updated 2001.

Facility Index System/Facility Identification Initiative Program Summary Report (FINDS) – List provided by the EPA. This listing contains both facility information and ‘pointers’ to other sources that contain more detail. The following databases are included: Permit Compliance System (PCS), Aerometric Information Retrieval System (AIRS), Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes (DOCKET), Federal Underground Injection Control (FURS), Criminal Docket System used to track criminal enforcement actions for all environmental statutes (C-DOCKET), Federal Facilities Information System (FFIS), State Environmental Laws and Statutes (STATE), and PCB Activity Data System (PADS). Last updated 2001.

Hazardous Materials Information Reporting System (HMIRS) – List provided by the EPA. This listing contains hazardous material spill incidents reported to the DOT. Last updated 2001.

Material Licensing Tracking System (MILTS) – List provided by the Nuclear Regulatory Commission. This listing contains approximately 8,100 sites, which possess or use radioactive materials and which are subject to NRC licensing requirements. Last updated March 18, 2010.

Mines Master Index File (MINES) – List provided by the Department of Labor, Mine Safety and Health Administration. Last updated 2001.

Federal Superfund Liens (NPL LIENS) – List provided by the EPA. This listing provides information on liens filed against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. Last updated 2001.

RCRA Administrative Action Tracking System (RAATS) – List provided by the EPA. This listing contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA after September 30, 1995; data entry in the RAATS database was discontinued.

Toxic Chemical Release Inventory System (TRIS) – List provided by the EPA. TRIS identifies facilities, which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313. Last updated 2001.

Toxic Substances Control Act (TSCA) – List provided by the EPA. This listing identifies manufacturers and importers of chemical substances included on the TSCA Chemical Inventory list. Last updated 2001.

FIFRA/TSCA Tracking System (FTTS) – FIFRA (Federal Insecticide Fungicide and Rodenticide Act) – List provided by the EPA. FTTS tracks administrative cases and pesticide

enforcement actions and compliance activities related to FIFRA, TSCA, and EPCRA (Emergency Planning and Community Right-to-Know-Act. Last updated 2001.

Hazardous Substance Cleanup Fund (SHWS) - List provided by the Alabama Department of Environmental Management. This listing contains state hazardous waste site records (the state's equivalent of CERCLIS). This listing was reviewed from the site outwards for a 0.50-mile radius. Last updated June 20, 2011.

Solid Waste Landfills (SWLF) – List provided by the Alabama Department of Environmental Management. This listing review includes recycling facilities, municipal solid waste landfills, permitted construction/demolition, and downgraded sanitary landfills, and inactive municipal solid waste landfills. These listings are reviewed from the site outwards for a 0.50-mile radius. Last updated 2001.

Leaking Underground Storage Tank (LUST) - Published by the Alabama Department of Environmental Management (ADEM), is a listing of underground storage tank facilities that have reported a release in the State of Alabama. This listing was reviewed from the site outward for a 0.50-mile radius. Last updated May 22, 2011.

Underground Storage Tank Report (UST) - Published by ADEM, is a listing of all registered underground storage tanks within the State of Alabama. This listing was reviewed from the site outward for a 0.25-mile radius. Last updated February 23, 2011.

Aboveground Storage Tank Report (AST) - Published by ADEM, is a listing of all registered aboveground storage tanks within the State of Alabama. This listing was reviewed from the site outward for a 0.25-mile radius. Last updated October 26, 2010.

There are twenty-three (23) listed facilities within the search radius established by ASTM guidance. Several sites in the EDR report were classified as mapped and are within the ASTM radius. These facilities are included in the EDR Radius Map in Appendix B.

3.2 Historical Research

Historical research was conducted to aid in determining the past use of the site. This research included reviews of reasonably ascertainable documentation obtained from the Jefferson County Tax Assessor's files, archived tax information, historical maps and aerial photographs. A Topographic map is included as **Figure 2**.

3.2.1 General Public Records

3.2.1.1 Current Tax Information

The Jefferson County Tax Assessors current records show that Horizon Investments, LLC of Birmingham, Alabama owns Parcel ID 38-10-03-14-04.001.

The property measures 60.1 x 140 ft² of land. There is a one (1) story commercial building on the subject property and a 50 x 140 ft² laydown/storage yard.

The property is currently zoned 16 and the current land use is listed Commercial. This property's sanitary sewer service is provided by Jefferson County and electrical power is provided by the Alabama Power Company.

3.2.1.2 Archived Tax Map Information

The Jefferson County tax map records were reviewed back to the year 2006. These records revealed the following information:

- Historical research shows that Horizon Investments, LLC owned the subject property from 2006 to the present.

3.2.1.3 Probate Records

- A warranty deed dated October 14, 1997 shows the transfer of the subject property that includes Lot 23A from the estate of Ann B. Phipps to Sandra Phipps O'Gara (Deed Book 9762, Page 5464).

3.2.1.4 Aerial Photographs

- An aerial photograph dated 2006 shows the subject property as it appears today. The Boyd Bros. Drilling building is visible on the property. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 2005 shows the subject property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1998 shows the property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1992 shows the property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1981 shows the property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1974 shows the property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1970 shows the property as it appears today. Surrounding land use appears to be a mix of commercial and residential.
- An aerial photograph dated 1967 shows the property as it appears today. Surrounding land use appears to be residential.

- An aerial photograph dated 1956 shows the property as it appears today. Surrounding land use appears to be residential.
- An aerial photograph dated 1951 shows the property as it appears today. Surrounding land use appears to be residential.
- An aerial photograph dated 1940 shows the property as it appears today. Surrounding land use appears to be residential.

3.2.1.5 Sanborn Fire Insurance Map

The Certified Sanborn Report is presented in **Appendix D**.

- A Sanborn Fire Insurance Map dated 1924 shows both the property and surrounding property was residential.
- A Sanborn Fire Insurance Map dated 1950 shows the property was labor type housing. The surrounding property is residential.
- A Sanborn Fire Insurance Map dated 1959 shows the property to contain labor type housing next to a woodworking building to the southwest. The surrounding property appears to be a mix of commercial and residential property. A residence is to the northeast, next door. An electrical shop exists at 1623 Carolina Avenue, next to a General Store. An Army Surplus store resides at 1627 Carolina Avenue.

3.2.1.6 City Directories

According to the City Directory, the property was vacant in 1965. The Birmingham City Directories indicates that the property has been a commercial area since 1969. It lists Joy Manufacturing Co. Drilling Contractors at the subject property from 1969 to 1984. From 1990 to 1996, the City Directory shows that C B C Drilling Contractors occupied the subject property. Boyd Bros. Drilling has been at the subject location from 1996 to the present.

3.2.1.7 Fifty Year Chain-of-Title

A Fifty Year Chain-of-Title was not included in the Scope of Work for this Phase I ESA. AEE reviewed readily available warranty deeds for the property only as a method of identifying historical land usage. This summary is not intended to be used as a record of title.

3.2.2 Previous Environmental Information Review

AEE reviewed a Phase I ESA proposed by Mr. John Wehby on September 23, 1997 for the subject property.

4.0 SITE RECONNAISSANCE

A representative of AEE conducted a ground reconnaissance of the subject property on September 26, 2011. During this reconnaissance, a thorough walkover of the site was accomplished using property boundaries as indicated on the Topographic Map (see **Figure 2**).

The subject property consists of a 60.1 x 140 ft² commercial building and a 50 x 140 ft² laydown/storage yard with asphalt-paved access from the northwest via Carolina Avenue. Underground utilities include Water, communications, natural gas, electricity, storm sewer and a septic tank system.

4.1 Periphery Reconnaissance

AEE gained access to the property granted by Mr. Betke, who has been working on the subject property since 1972.

The property is occupied by a one (1) story commercial building composed of brick and cinderblock with a built up roof (see **Photograph No. 1, 2 and 3**) and a fenced-in laydown/storage yard one lot down to the north (see **Photograph No. 6**). The entrance to both properties is to the northwest side of the building which faces Carolina Avenue (see **Photograph No. 1, 2 and 3**)

4.2 Building Reconnaissance

The warehouse area on site is constructed on a concrete slab with cinderblock walls and a drop in ceiling (see **Photograph No. 2, 8, 9, 10, and 11**). It stores drill rig parts, oil, hydraulic fluid, a skid tank, mineral spirits, solvents, car parts, and various cleaners (see **Photograph No. 8, 9, 10 and 14**).

The office area consists of wood paneling walls, 9 x 9 floor tile, and a drop in ceiling (see **Photograph No. 13**).

4.3 Interviews

AEE interviewed Mr. James Betke with Lange Christenson who has been working for the subject property since 1972. Mr. Betke said that the building has been used as a maintenance shop as long as he has been associated with it. He said they mostly work on small support trucks in the shop and the drill rig maintenance is performed in the field. He said that they have had no reportable spills at the facility. They use mineral spirits and petroleum Naptha for cleaning parts. Sparkle Corporation picks up and recycles their used solvents.

Mr. Fawal filled out an Owner's Questionnaire; the results are in **Appendix E**.

Mr. Jim Parker with the Alabama Department of Environmental Management (ADEM) stated that he is not familiar with any environmental problems for this subject property.

4.4 Stored Chemicals, Raw Materials and Hazardous Materials

There were several stored chemicals, raw materials or hazardous materials on the property. This includes oil, hydraulic fluid, solvents, and various cleaners.

4.5.Storage Tanks

4.5.1 Aboveground Storage Tanks (ASTs)

There were several portable skid tanks observed on the property. These skid tanks are used for holding used water and are used to support drilling operations.

4.5.2 Underground Storage Tanks (USTs)

According to the EDR Radius Map Report, there is one (1) UST listed on the subject site which has been dealt with accordingly. The Alabama Department of Environmental Management submitted a “No Further Action Letter” on May 10, 1991, declaring the UST closed.

4.8 Asbestos Containing Materials

No suspect asbestos containing material was observed during the site reconnaissance.

4.9 Radon

AEE reviewed the Alabama Map of Radon Zones produced by the EPA. The EPA’s Map of Radon Zones assigns each of the 3,141 counties of the United States to one of three zones based on radon potential. These three zones are as follows:

- Zone 1 counties have predicted average indoor screening levels greater than 4 picoCuries per liter of Air (pCi/L).
- Zone 2 counties have predicted average screening levels between 2 and 4 pCi/L.
- Zone 3 counties have predicted average screening levels less than 2 pCi/L.

Jefferson County is classified as falling within a Zone 2 Radon Area. Sites located within Jefferson County have the highest radon potential with predicted average screening levels ranging from 2 to 4 pCi/L.

4.10 Wells

There were no apparent visual indications of wells observed during the site reconnaissance.

4.11 Landfills

Field reconnaissance of the site revealed no obvious visual surface signs of the hummocky topography, stained soil, or stressed vegetation indicative of past or present landfill activity.

4.12 Pits, Sumps, Drywells or Catch basins

There are no pits, sumps, dry wells or catch basins observed on site.

4.13 Drinking Water, Waste Water Streams and Utilities

Underground utilities include water, communications, electricity, storm drain lines and a sewer line system.

4.14 Underground Pipelines

The underground pipelines at the subject property include water and a waste water feed to the sanitary sewer system.

4.15 Wetlands

During AEE's site reconnaissance, topographical, vegetation and hydrological conditions conducive to the occurrence of wetlands were not readily apparent on this site.

5.0 CONCLUSIONS

AEE has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the site located at:

1631 Carolina Avenue
Bessemer, Jefferson County, Alabama

Horizon Investors, LLC owns the 1631 Carolina Avenue facility and is currently the only occupant of the property. The business is currently open. Horizon Investors, LLC is auctioning off the property to the public and this Phase I ESA has been conducted as a baseline assessment for that purpose.

The findings of this assessment indicate that there are no recognized environmental concerns at this time, except the possible presence of asbestos containing materials on site.

6.0 OPINIONS/RECOMMENDATIONS

Based on the findings of this assessment, AEE has no opinions/recommendations at this time.

7.0 CLOSING REMARKS/CERTIFICATION

This Phase I Environmental Site Assessment is presented for the exclusive use of Horizon Investors, LLC. The findings are based solely on the sources cited within. Both surface and subsurface environmental conditions may change due to land usage or off-site factors. The opinions and findings in this report reflect conditions apparent at the time the work was conducted.

This report is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of AEE. In expressing the opinions stated in this report, AEE has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that AEE assumes no responsibility or liability for their accuracy.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client or their representative has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the onsite visit.

Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that AEE assumes no responsibility or liability for their accuracy.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR and we have the specific qualifications, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.
